

# TAKE ACADEMIC SECURITY TO A HIGHER DEGREE

## MARKETPLACE CHALLENGE

With an estimated 700 diploma mill and counterfeit transcript websites on the Internet, academic fraud is an international industry costing American education millions in lost revenue, time-consuming transcript checks and misappropriated scholarships. Each year the hard work, dedication and financial investment of students and schools is jeopardized by the growing use of fraudulent diplomas and academic transcripts. Whether they offer “replacement record” services or “novelty” look-alike transcripts, these diploma mills undermine true effort and put the reputation of legitimate schools at risk. Employers, government agencies and education institutions themselves need a cost-effective, secure method of authenticating academic transcripts and overall achievement.

## AUTHENTIGUARD® SOLUTION

Document Security Systems' security solutions are designed to help guarantee the authenticity of every diploma, transcript, letter of recommendation and other academic documents your school issues – validating your students' hard work and your institution's esteemed reputation. Our AuthentiGuard® technology suite delivers smart solutions that are cost-effective and can be layered for greater levels of security.

As the recognized leader and innovator of patented protection against counterfeiting, illicit copying, scanning and photo imaging, Document Security Systems offers proven anti-counterfeiting technology, processes and products to ensure the authenticity of every academic form you issue.

Contact us today to develop intelligent customized solutions to ensure that your academic security is in a class by itself.
